

## Electoral division rankings: Census 2006 second release

Paul Nelson  
Statistics & Mapping Section

### Executive summary

This research paper provides an analysis by Commonwealth electoral division of socio-demographic data from the second release of the 2006 Census of Population and Housing. The electoral boundaries used in this paper are the current boundaries used at the 2007 federal election.

## Introduction

This research paper provides an analysis by Commonwealth electoral division of socio-demographic data from the second release of the *2006 Census of Population and Housing*. The electoral boundaries used in this paper are the current boundaries used at the 2007 federal election. These boundaries are normally referred to as the 2006 boundaries because the redistribution that created the new boundaries occurred in 2006.

This paper is an updated version of an earlier paper that was based on the first release of the 2006 census. It now includes tables covering the additional second release census data on the labour force, employment, occupation and education. The 60 separate tables in this research paper cover a broad range of census topics and broadly reflect the items most frequently requested from the Parliamentary Library.

In addition to new tables, this paper also has small differences in the electoral level data compared with the earlier paper that was based on first release data. This is because second release census data are available for the current federal electoral divisions, whereas the first release data for the new electoral divisions needed to be estimated using Census Collection District level data that are subject to confidentiality adjustments.

Data for each characteristic are presented tabularly in two ways. The first table lists each electoral division alphabetically and shows the simple value of the characteristic. The second table ranks each electoral division on the relative value of the characteristic and in most cases the characteristic has been standardised (usually as a percentage of some total measure) to provide a more meaningful measure. The ranking is in ascending order, i.e. lowest value to highest value. A footnote is included with some tables where it is not obvious how a characteristic has been defined. The political party that holds each division following the 2007 election is also shown in each table.

Appendix 1 contains the value and relative value of each characteristic for Australia and each state and territory. This allows an individual electorate to be compared against the Australia or state/territory average. However, it should be noted that electorate level data do not sum to the state/territory total because some 2006 census data cannot be coded to a specific electorate of usual residence, but can be coded to a state/territory of usual residence.

Appendix 2 contains the demographic classification of each electorate as defined by the Australian Electoral Commission. Each division is classified as being in one of four possible socio-demographic categories. Inner metropolitan divisions comprise well established built-up suburbs located in capital cities. Outer metropolitan divisions comprise areas of more recent suburban expansion. Provincial divisions comprise areas with a majority of enrolments in major provincial cities, or in non-metropolitan urban conglomerates. Rural divisions comprise areas without a majority of enrolments in major provincial cities.

## **Main features**

This section provides an overview of some of the more interesting features of selected tables.

### ***Table 1 – Total population***

The seven divisions with the lowest population comprise all the divisions in Tasmania and the Northern Territory.

Tasmania retains five electoral divisions due to the Constitutional provision that guarantees a minimum of five seats in the House of Representatives for each ‘Original State’.

The calculation of representation entitlement that last occurred in November 2005 resulted in the Northern Territory having a quota of just over 1.5 resulting in an entitlement of two seats. As a result the two divisions in the Northern Territory have relatively small populations.

### ***Table 4 – Persons aged under 5 years***

Of the 20 divisions with the lowest proportion of persons under 5 years of age, 12 are held by the Coalition while eight are held by the ALP and 13 of the 20 are inner metropolitan areas.

Of the 20 divisions with the highest proportion of persons under 5 years of age, 16 are held by the ALP while four are held by the Liberal Party and 12 of the 20 are outer metropolitan areas.

The division with the highest proportion is Lingiari (8.8 per cent) followed by Kalgoorlie (8.5 per cent) while the division with the lowest proportion is Sydney (4.0 per cent) followed by Melbourne (4.5 per cent). The Australian average figure is 6.3 per cent.

### ***Table 8 – Persons aged 65 years and over***

Of the 20 divisions with the lowest proportion of persons aged 65 years and over, 14 are held by the ALP while six are held by the Coalition and 14 of the 20 are outer metropolitan areas.

Of the 20 divisions with the highest proportion of persons aged 65 years and over, 11 are held by the Coalition (with four held by the Nationals) while nine are held by the ALP and 10 of the 20 are rural electorates with another four located in provincial areas.

The division with the highest proportion is Gilmore (21.5 per cent) followed by Lyne (21.1 per cent) while the two Northern Territory seats have the lowest proportions - Lingiari (4.4 per cent) and Solomon (5.3 per cent). The Australian average figure is 13.3 per cent.

### ***Table 12 – Persons of Christian religion***

Of the 10 divisions with the highest proportion of persons of Christian religion, eight are in New South Wales and seven of the 10 are rural areas.

The three divisions with the highest proportion of persons of Christian religion are all rural areas held by the Nationals - Calare (82.0 per cent), Riverina (80.8 per cent) and Parkes (79.9 per cent).

The divisions with the lowest proportion are Sydney (39.6 per cent), Melbourne Ports (41.3 per cent), Melbourne (41.0 per cent), and Wentworth (44.5 per cent). The six divisions with the lowest proportion are all inner metropolitan divisions located in Sydney or Melbourne. The Australian average is 63.9 per cent.

#### ***Table 14 – Persons of Islamic religion***

The 20 divisions with the highest proportion of persons of Islamic religion are all ALP held seats in metropolitan areas of Sydney and Melbourne. Divisions with a very high proportion of overseas born persons also tend to have high proportions of persons of the various non-Christian religions.

The division with the highest proportion of persons of Islamic religion is Reid (18.1 per cent) followed by Blaxland (15.3 per cent) and Calwell (13.3 per cent).

There are 22 divisions that share having the lowest proportion of persons of Islamic religion (0.1 per cent) with 19 of the 22 being in rural areas. The Australian average figure is 1.7 per cent.

#### ***Table 16 – Persons of Indigenous origin***

This table covers persons who self identify as being Aboriginal, Torres Strait Islander, or both Aboriginal/Torres Strait Islander on the census form.

Of the 10 divisions with the highest proportion of persons of Indigenous origin, only three are held by the ALP – Lingiari, Solomon and Leichhardt. Of the 20 divisions with the highest proportion of Indigenous persons, only two are in metropolitan areas (Solomon with 10.3 per cent and Franklin with 4.2 per cent).

The division with the highest proportion is Lingiari (43.5 per cent) which has more than twice the concentration of the next highest division (Kalgoorlie with 18.3 per cent). The Australian average figure is 2.3 per cent.

#### ***Table 17 – Persons born overseas***

Of the 20 divisions with the highest proportion of persons born overseas, only three are held by the Coalition and all the divisions are located in metropolitan areas. Conversely, the 20 divisions with the lowest proportion of persons born overseas are all non-metropolitan divisions.

Of the 10 divisions with the highest proportion of persons born overseas, eight are in Sydney with the other two in Melbourne.

The division with the highest proportion is Reid (49.5 per cent) followed by Watson (47.8 per cent) while the division with the lowest proportion is Parkes (5.3 per cent) followed by Calare (5.4 per cent). The Australian average figure is 22.2 per cent.

***Table 20 – Persons born in United Kingdom or Ireland***

Electoral districts ranked by the proportion of persons born in the United Kingdom (UK) or Ireland exhibits a very different pattern to the ranking based on the more general measure of the proportion of persons born overseas.

The four divisions with the lowest proportion of persons born in UK and Ireland are the inner metropolitan Sydney divisions of Blaxland (1.3 per cent), Watson (1.3 per cent), Reid (1.4 per cent) and Fowler (1.6 per cent). However, these four divisions are ranked in the top five divisions in terms of the highest proportion of persons born overseas.

Of the 20 divisions with the highest proportion of persons born in the UK or Ireland, 12 are in Western Australia and five are in South Australia. The division with the highest proportion is Moore (20.3 per cent) followed by Brand (16.8 per cent). The Australian average is 5.5 per cent.

***Table 23 – Couple families with dependent children***

Of the 20 divisions with the highest proportion of couple families with dependent children, 15 are located in outer metropolitan areas and 14 of the top 20 are held by the Liberal Party while the other six are held by the ALP.

The divisions with the highest proportion are Mitchell (48.6 per cent), Berowra (47.1 per cent), Holt (45.6 per cent) and Greenway (45.6 per cent).

The divisions with the lowest proportion are the inner city divisions of Sydney (21.6 per cent), Melbourne (24.9 per cent) and Melbourne Ports (28.9 per cent). The Australian average is 37.0 per cent.

***Table 26 – Lone person households***

Inner metropolitan divisions feature prominently at the higher end of the rankings while outer metropolitan divisions dominate at the lower end of the rankings.

Of the 20 divisions with the highest proportion of lone person households, 17 are inner metropolitan areas while 19 of the 20 divisions with the lowest proportion are outer metropolitan divisions.

The division with the highest proportion is Melbourne Ports (37.9 per cent), followed by Wentworth (37.3 per cent) and Sydney (37.0 per cent).

The divisions with the lowest proportion are Fowler (12.7 per cent) and Mitchell (12.7 per cent). The Australian average is 24.4 per cent.

***Table 28 – Families with weekly income below \$650***

Of the 20 divisions with the highest proportion of families with a weekly income of under \$650, 16 are rural divisions.

Of the 20 divisions with the lowest proportion, 14 are inner metropolitan divisions while the other six are outer metropolitan divisions.

The eight divisions with the lowest proportion comprise six divisions around Sydney (all held by the Liberal Party) and the two divisions of the ACT (held by the ALP).

The division with the highest proportion is Cowper (37.0 per cent), followed by Hinkler (36.3 per cent) and Lyne (35.5 per cent). These three seats are held by the Nationals.

The division with the lowest proportion is North Sydney (8.5 per cent), followed by Warringah (9.4 per cent) and Wentworth (9.5 per cent). The Australian average figure is 22.1 per cent.

***Table 29 – Families with weekly income \$2000 and above***

Of the 20 divisions that have the highest proportion of families with a weekly income of \$2000 and above, 13 are held by the Liberal Party and the other seven by the ALP while 16 of the 20 are inner metropolitan areas and the other four are outer metropolitan areas.

Of the 20 divisions with the lowest proportion, eight are held by the ALP, seven are held by the Nationals and four are held by the Liberal Party, while 16 of the 20 are rural divisions.

The five divisions with the highest proportion are located in Sydney. The division with the highest proportion is North Sydney (51.2 per cent), followed by Wentworth (47.8 per cent) and Bradfield (46.0 per cent).

The division with the lowest proportion is Cowper (7.0 per cent), followed by Hinkler (7.5 per cent) and Lyons (7.9 per cent). The Australian average figure is 19.8 per cent.

***Table 40 – Rented dwellings***

Of the 10 divisions with the lowest proportion of rented dwellings, nine are held by the Liberal Party while eight of the 10 are outer metropolitan divisions and the other two are rural divisions.

The division with the lowest proportion is Aston (13.4 per cent) followed by Menzies (13.7 per cent) and Berowra (14.9 per cent).

Of the 10 divisions with the highest proportion of rented dwellings, eight are held by the ALP while seven of the 10 highest ranking divisions are inner metropolitan areas.

The division with the highest proportion is Sydney (58.0 per cent) followed by Melbourne (56.7 per cent) and Lingiari (53.0 per cent). The Australian average is 28.1 per cent.

***Table 42 – Dwellings being purchased***

Of the 10 divisions with the highest proportion of dwellings being purchased, six are held by the Liberal Party and four by the ALP. Six of the 10 are also in Victoria and only one is in NSW. Outer metropolitan divisions dominate the higher end of the rankings (highest proportion being purchased) with 18 of the 20 highest proportions.

Inner metropolitan and rural divisions dominate the other end of the rankings. Of the 10 divisions with the lowest proportion of dwellings being purchased, nine are inner metropolitan divisions and seven of the 10 divisions are held by the ALP.

The division with the lowest proportion is Melbourne (21.2 per cent), followed by Wentworth (22.0 per cent) and Kingsford Smith (22.8 per cent).

The division with the highest proportion is Holt (55.1 per cent), followed by Cowan (51.0 per cent) and Lalor (50.7 per cent). The Australian average is 34.1 per cent.

***Table 49 – Unemployed persons***

Of the 10 divisions ranked lowest on the basis of the unemployment rate, five are located in metropolitan areas of Sydney and four are located in metropolitan areas of Perth. These nine seats are held by the Liberal Party. Canberra is the only ALP held seat in the 10 divisions with the lowest unemployment rate.

The division with the lowest unemployment rate is Mackellar (2.7 per cent), followed by Warringah (2.8 per cent) and North Sydney (2.9 per cent).

Of the 10 divisions ranked highest on the basis of the unemployment rate, eight are in New South Wales while six are held by the ALP and three are held by the National Party.

The division with the highest unemployment rate is Cowper (10.4 per cent), followed by Blaxland (10.2 per cent) and Lyne (9.4 per cent). The Australian average figure is 5.2 per cent.

***Table 50 – Unemployed persons 15 to 19 years***

Of the 10 divisions ranked lowest on the basis of the youth unemployment rate, seven are in Western Australia. Seven of the 10 divisions are held by the Liberal Party and three by the ALP. Of these 10 seats, four are in outer metropolitan areas, three are inner metropolitan areas and three are rural areas.

The division with the lowest youth unemployment rate is Cowan (7.4 per cent), followed by Forrest (7.6 per cent) and Mackellar (7.7 per cent).

Of the 10 divisions ranked highest on the basis of the youth unemployment rate, nine are in New South Wales and all 10 are held by the ALP.

The divisions with the highest youth unemployment rate are Melbourne (22.2 per cent) and Chifley (22.2 per cent), followed by Throsby (20.8 per cent). The Australian average figure is 13.1 per cent.

Except to the extent of uses permitted by the *Copyright Act 1968*, no person may reproduce or transmit any part of this work by any process without the prior written consent of the Parliamentary Librarian. This requirement does not apply to members of the Parliament of Australia acting in the course of their official duties.

This work has been prepared to support the work of the Australian Parliament using information available at the time of production. The views expressed do not reflect an official position of the Parliamentary Library, nor do they constitute professional legal opinion.

Feedback is welcome and may be provided to: [web.library@aph.gov.au](mailto:web.library@aph.gov.au). Any concerns or complaints should be directed to the Parliamentary Librarian. Parliamentary Library staff are available to discuss the contents of publications with Senators and Members and their staff. To access this service, clients may contact the author or the Library's Central Entry Point for referral.
